“Where do you want to be in ten years?”

It’s a daunting question, no matter where you are now.

Life changes, careers go in different directions. Most people learn things along the way that make them smarter and wiser.

A better question: “What is the life you imagine for yourself?” Who are the people in it? How are you spending your time? How does your career fit into that picture?

This book is designed to help you plan for that future, with predictions for where Seattle-King County will be in the next decade, focusing on not just a job, but a career where you can thrive.

MAP YOUR CAREER

WHO MADE THIS?

The Workforce Development Council of Seattle-King County (SeaKingWDC.org) links talented people with bright careers, and oversees WorkSource Seattle-King County (WorkSourceSKC.org) at more than 40 locations, part of the statewide WorkSource network (WorkSourceWA.com) and nationwide American Job Center Network (CareerOneStop.org).
The government and other groups spend a lot of time studying who does what kind of work, how much money they make, where they live, and who’s hiring. When all this data is put together, we get a general picture of the economy—which parts are growing and shrinking, and which are likely to be good choices for people looking for jobs.

For this book, we’ve compiled information from EMSI, JobsEQ, the United States Census, and aggregated job postings from sites like Monster and Indeed.

**WHAT IS THIS BOOK?**

*Map Your Career* is an educational tool designed to illustrate the current and predicted labor market in Seattle-King County. The resources in this book are grouped into industries—like “healthcare” or “manufacturing”—big parts of the economy, chosen based on their projected growth, job demand, and potential for career advancement.

For each industry, learn about current trends, sample wages, and career pathways. Use this information to add to your own feelings and intuition about your interests and passions, how you see your future, and what you hope to achieve throughout your career.

**WHERE DID THIS INFO COME FROM?**

The government and other groups spend a lot of time studying who does what kind of work, how much money they make, where they live, and who’s hiring. When all this data is put together, we get a general picture of the economy—which parts are growing and shrinking, and which are likely to be good choices for people looking for jobs.

For this book, we’ve compiled information from EMSI, JobsEQ, the United States Census, and aggregated job postings from sites like Monster and Indeed.
As you begin to map your career, it’s important to consider your personal work values—things like independence, compensation, or variety. Nobody can tell you what to choose—only you know what’s most important. Knowing your values can help you understand the types of work that will give you the most fulfillment in your career.

For each of the values below, choose the statement that you agree with most strongly. There are no right or wrong answers, only food for thought as you explore the industries and careers that interest you.

START WITH AN OCCUPATION

Work or a job performed for $500

LEVEL UP TO HIGHER POSITIONS

Associate’s Degree: 2-year college degree that can be earned from a range of institutions, including community colleges, technical and vocational schools, and private or state colleges, universities, and affiliates.

Bachelor’s Degree: 4-year college degree. Bachelor’s degrees are generally awarded by private or state colleges or universities.

Advanced Degree: Master’s (1-3 years) or doctorate (3-7 years). Most master’s and doctorate degrees are awarded by private or state universities.

BY GAINING EXPERIENCE

The longer you work in a position, the better you get at the job and the more trust you can earn from your manager and co-workers. In many industries, this is the most common way to advance.

OR GETTING AN EDUCATION

Avenues intended to prepare people for their desired occupations through education and skills training with a focus on self-sufficiency and ongoing career advancement.

Each occupation has a title and range of hourly wages. (2018) Entry-Level to Experienced $35 - $56

Maps are grouped by industry. Businesses that produce similar goods or provide similar services.

FROM THE CENTER OUT

Some maps show career pathways that move in less of a straight line. Start in the center, and work your way out by education/experience level.

FROM LEFT TO RIGHT

Some maps show career pathways that have a bit more structure, often with clear stages of advancement. Begin on the left side and move to the right, advancing with education and experience.
Healthcare is one of the fastest growing industries in Seattle-King County, with nearly one quarter of Washington state’s health systems, and one of the largest metropolitan public health departments in the country. Healthcare job demand has been growing for several decades, and an increase in both retirements and demand for services presents even greater career opportunities in the future.

This map includes some of the most in-demand healthcare jobs in Seattle-King County, including branches like nursing and therapeutic care, but the industry has many other opportunities—from behavioral health to marketing. Although career progression is largely tied to education, entry-level positions provide a helpful window into healthcare’s different branches.
Manufacturing has been an important industry in Seattle-King County for over a century. A wide variety of food, medical, and high-tech products for use across the world are made here. New technologies are changing the industry, but an increase in retirements due to an aging workforce creates new career opportunities in the region.
This map includes some of the most in-demand manufacturing jobs in Seattle-King County, which has a specialized, regional focus on aerospace, including airplane manufacturing and supplier networks. Industry branches range from design to quality control, and although education can accelerate engineering pathways, hands-on experience is essential for most occupations.

NEXT STEPS

Life won’t always go according to plan, but if you’re thoughtful about your steps, you can adapt to change and get to where you want to be.

MAKE A PLAN

RESEARCH
• Look into occupations that fit your interests. Which are most interesting?
• Check out organizations where you’d want to work. What do you like about it?
• Determine which training and/or education programs may be necessary. What do you need to apply?
• Find people doing what you want to do. How did they get there?

REFLECT
• Remember your personal work values from page 2. How do they fit in?
• Think about your goals for the future. What are some short-term and long-term goals to help you get there?
• Share your ideas with friends, family, and mentors. How can they support you?

TAKE ACTION

NETWORK
• Make a list of people you know. Friends, family, teachers, church, sports—who else?
• Arrange phone calls or meetings to see who can help you. Do they know anyone else they could connect you with?
• Schedule informational interviews for positions that interest you. What questions do you have about the role?
  • Don’t forget to send a thank-you note!

APPLY
If your next step is school/training:
• Make a list of schools or training programs and the required application materials. When are these due?

If your next step is a job:
• Work on your resume and cover letter. Who can help you?

REVISIT YOUR PLAN

• As you learn more and gain more experience, review your plan. Has anything changed?
• Check-in with your mentors. Is there anything you need from them?
